Sign the Petition: Ban Human Cloning Once and For All in LA!

Please Print
Neatly!

Whereas: Louisiana currently provides no protection against the life destroying actions of human cloning and embryonic stem cell research.

Whereas: Since 2004, Louisiana Right to Life Federation, along with other pro-life groups, has encouraged the passage of an ***authentic human cloning ban*** in the Louisiana Legislature that bans all forms of cloning, both for research and reproduction.

Whereas However, certain special interest groups have stood in the way by promoting **phony cloning bans** that do not protect life.

Whereas: New scientific developments in 2007 have proven that there are ethical approaches to research with great potential, leaving NO reason for the destructive and unsuccessful work of human cloning for embryonic stem cell research to continue.

Therefore: I, a citizen of the state of Louisiana, want to protect human life by embracing ethical cures, not destructive clones. With Louisiana Right to Life Federation and thousands of other pro-life people, I petition the Louisiana Legislature to pass an ***authentic*** human cloning ban and for Governor Jindal to sign the legislation into law.
